the research has provided insights into the area of look up behaviour in particular look up strategies a coding scheme of 51 executive cognitive and metacognitive operations has been derived from the think aloud data on the basis of the codes seven types of strategies were identified ignoring assuming minimizing checking paraphrasing stretching and maximizing the results also indicated that the look up strategies preferred one part either I1 translation equivalents or I2 definitions rather than both parts I1 translation equivalents and I2 definitions of the bilingualised entries four other factors i e language preference language proficiency target words and I2 definitions could also influence the use of the bilingualised entries in various degrees learners were shown to have common as well as different patterns of strategy use most learners attempted a variety of strategies while one learner repeatedly utilized one type of strategy the frequency of strategy use for individual learners usually fluctuated when different types of strategies were used although a wide variety of strategies were used not every strategy was used frequently the most frequently used strategy was maximizing which was used in 112 look ups out of a total of 264 it appears that the learners repeatedly used strategies they are familiar with or they think are effective and do not spontaneously try other strategies that they may know and that may be effective

this is the first history of dictionaries of english for foreign learners from their origins in japan and east asia in the 1920s to the computerized compilations of the present monolingual dictionaries for foreign speakers were a revolutionary development at their outset and now represent a coming together of intellectual technological and commercial forces almost unequalled in book publishing as the author shows the early history of efl dictionaries was research driven arising directly from research in linguistic theory and language pedagogy now it is user driven determined by what users require or are thought to require the pioneering dictionaries were the work of individuals current dictionaries are the products of huge databases manipulated by sophisticated processing as publishers strive to share an immense and constantly growing global market the book has both a thematic and a chronological structure three chapters describe the historical sequence over a period of some sixty years these alternate with chapters dealing with phraseology computers and corpus linguistics and research into dictionary users and uses three subjects central to the development of elt dictionaries over the last thirty years dr cowie examines the way in which availability of massive computing power has transformed the recording and

analysis of current speech and shows how the growth of research into the users and uses of dictionaries has led to developments both in elt lexicography and method this readable and non technical account is directed both at professionals in applied linguistics and english language teaching and at lexicographers but it will interest and fascinate everyone concerned with the analysis of english and faced with the challenge of recording of the subtelties of its grammar and meaning
