winner of the pfizer award for outstanding book in the history of science margaret rossiter s widely hailed women scientists in america struggles and strategies to 1940 marked the beginning of a pioneering effort to interpret the history of american women scientists that effort continues in this provocative sequel that covers the crucial years of world war ii and beyond rossiter begins by showing how the acute labor shortage brought on by the war seemed to hold out new hope for women professionals especially in the sciences but the public posture of welcoming women into the scientific professions masked a deep seated opposition to change rossiter proves that despite frustrating obstacles created by the patriarchal structure and values of universities government and industry women scientists made genuine contributions to their fields grew in professional stature and laid the foundation for the breakthroughs that followed 1972

at the start of the industrial revolution it appeared that most scientific instruments were made and sold in london but by the time of the great exhibition in 1851 a number of provincial firms had the self confidence to exhibit their products in london to an international audience how had this change come about and why this book looks at the four main and two lesser english centres known for instrument production outside the capital birmingham liverpool manchester and sheffield along with the older population centres in bristol and york making wide use of new sources dr morrison low curator of history of science at the national museums of scotland charts the growth of these centres and provides a characterisation of their products new information is provided on aspects of the trade especially marketing techniques sources of materials tools and customer relationships from contemporary evidence she argues that the principal output of the provincial trade with some notable exceptions must have been into the london marketplace anonymously and at the cheaper end of the market she also discusses the structure and organization of the provincial trade and looks at the impact of new technology imported from other closely allied trades by virtue of its approach and subject matter the book considers aspects of economic and business history gender and the family the history of science and technology material culture and patterns of migration it contains a myriad of stories of families and firms of entrepreneurs and customers and of organizations and arms of government in bringing together this wide range of interests dr morrison low enables us to appreciate how central the making selling and distribution of scientific instruments was for the

industrial revolution
