this book presents a distinctive approach to the study of law in society focusing on the sociological interpretation of legal ideas it surveys the development of connections between legal studies and social theory and locates its approach in relation to sociolegal studies on the one hand and legal philosophy on the other it is suggested that the concept of law must be reconsidered law has to be seen today not just as the law of the nation state or international law that links nation states but also as transnational law in many forms a legal pluralist approach is not just a matter of redefining law in legal theory it also recognizes that law's authority comes from a plurality of diverse sometimes conflicting social sources the book suggests that the social environment in which law operates must also be rethought with many implications for comparative legal studies the nature and boundaries of culture become important problems while the concept of multiculturalism points to the cultural diversity of populations and to problems of fragmentation or perhaps to new kinds of unity of the social theories of globalization raise a host of issues about the integrity of societies and about the need to understand social networks and forces that extend beyond the political societies of nation states through a range of specific studies closely interrelated and building on each other the book seeks to integrate the sociology of law with other kinds of legal analysis and engages directly with current juristic debates in legal theory and comparative law

how can the european union create laws that are uniform in a multitude of languages specifically how can it attain both legal integration and language diversity simultaneously without the latter compromising the former c j w baaij argues that the answer lies in the domain of translation a uniform interpretation and application of eu law begins with the ways in which translators and jurist linguists of the eu legislative bodies translate the original legislative draft texts into the various language versions in the european union law and language are inherently

connected the eu pursues legal integration i e the incremental harmonization and unification of its member states laws for the purpose of reducing national regulatory differences between member states however in its commitment to the diversity of european languages its legislative institutions enact legislative instruments in 24 languages language diversity and legal integration assesses these seemingly incompatible policy objectives and contemporary translation practices in the eu legislative procedure and proposes an alternative source oriented approach that better serves eu policy objectives contrary to the orthodox view in academic literature and to the current policies of the eu this book suggests that the english language version should serve as the original and only authentic legislative text translation into the other language versions should furthermore avoid prioritizing clarity and fluency over syntactic correspondence and employ neologisms for distinctly eu legal concepts ultimately baaij provides practical solutions to the conflict between the equality of all language versions and the need for uniform interpretation and application of eu law
