this book deals with contemporary epistemological questions connecting
educational philosophy with the field of science and technology studies it can be
understood as a draft of a general theory of world disclosure which is in its core a
distinction between two forms of world disclosure experiment and exploration these
two forms have never been clearly distinguished before the focus lies on the
experimental form of world disclosure which is described in detail and in contrast to
the explorational form along the line of twenty one characteristics which are mainly
derived from empirical studies of experimental work in the field of natural sciences it
can also be understood as an attempt to integrate elements of the anglo saxon
philosophy of science with elements of the german tradition of educational
philosophy this is also reflected in the style of writing in accordance to the content
level of the book the argument for experimental forms of world disclosure is written
in an essayistic readable style which can be understood as an experimental form of
writing this book is a translation of the doctoral thesis experiment und exploration
bildung als experimentelle form der welterschließung summa cum laude the thesis
was published in german in 2010 by transcript bielefeld in the series called theorie
