the endurance time method etm is a seismic analysis procedure in which intensifying dynamic excitations are used as the loading function and it provides many unique benefits in the design of structures it can largely reduce the computational effort needed for the response history analysis of structures this aids in the practical application of response history based analysis in problems involving very large models and or requiring numerous analyses to achieve optimal design goals a single response history analysis through

etm provides an estimate of the system response at the entire range of seismic intensities of interest thus making it ideal for applications such as seismic risk assessment life cycle cost analysis and value based seismic design conceptual simplicity also makes etm a useful tool for preliminary response history analysis of structural systems features presents full coverage of the subject from basic concepts to advanced applied topics provides a coherent text on endurance time excitation functions that are essential in endurance time analysis seismic analysis and design using the endurance time method serves as a comprehensive resource for students researchers and practicing structural engineers who want to familiarize themselves with the concepts and applications of the endurance time method etm as a useful tool for dynamic structural analysis

the field of education is in constant flux as new theories and practices emerge to engage students and improve the learning experience research advances help to make these improvements happen and are essential to the continued improvement of education the handbook of research on applied learning theory and design in modern education provides international perspectives from education professors and researchers cyberneticists psychologists and instructional designers on the processes and mechanisms of the global learning environment highlighting a compendium of trends strategies methodologies technologies and models of applied learning theory and design this publication is well suited to meet the research and practical needs of academics researchers teachers and graduate students as well as curriculum and instructional design professionals
