engineering applications of fracture analysis is a record of the proceedings of the first
national conference on fracture held at johannesburg south africa in november 1979
the papers presented in the conference provide a general picture of fracture studies in
south africa the contributions cover the theoretical analyses of the influence of
dislocation stresses in initiating fracture practical design of steel components exposed
to high temperature environments problems encountered in south african industry
such as rock drilling equipment failures unwanted rock fractures in mines and safety
problems in nuclear reactors fracture study techniques and formal applications of
fracture mechanics the book will be of interest to metallurgists engineers and materials
