the relationship between natural capital and economic growth is an open debate in the field of economic development is an abundance of natural resources a blessing or a curse for economic performance the field of economic history offers an excellent vantage to explore the relevance of institutions technical progress and supply demand drivers natural resources and economic growth contains theoretical and empirical articles by leading scholars who have studied this subject in different historical periods from the 19th century to the present day and in different parts of the world part i presents the theoretical issues and discusses the meaning of the curse and the relevance of the historical perspective part ii captures the diversity of experiences presenting thirteen independent case studies based on historical results from north and south america africa asia oceania and europe this book emphasizes that an abundance of natural resources is not a fixed situation it is a process that reacts to changes in the structure of commodity prices and factor endowments and progress requires capital labour technical change and appropriate institutional arrangements this abundance is not a given but is part of the evolution of the economic system history shows that institutional quality is the key factor to deal with abundant natural resources and especially with the rents derived from their use and exploitation this wide ranging volume will be of great relevance to all those with an interest in economic history development economic growth natural resources world history and institutional economics

natural resources in european history pulls together several papers from the bellagio conference on natural resources and economic development which took place in 1977 originally published in 1978 this report focuses on papers exploring the history of natural resources in continental europe presenting research on how resources were traded

collected and depleted between the fifteenth and nineteenth century this title will be of interest to students of environmental studies or with an interest in environmental history

the role of natural resources in fostering economic development is examined for key historical epochs from the agricultural revolution in 8 000 bc to the present natural resource exploitation has been important to development for most of global history depending on which epoch is examined resource based development could be viewed as quot successfulquot and sometimes not simply because a developing economy or region was endowed with abundant natural resources does not guarantee that its natural wealth is exploited efficiently and generates productive investments institutional factors also matter and environmental conditions may also determine whether or not countries develop quot goodquot institutions
